SDL TRADOS Technologies is delighted to announce the release of Service Pack 2 (SP2) to all existing users of SDL Trados 2007. SDL Trados 2007 SP2 , with SDL Package Technology, delivers a host of new features as well as improved performance bringing increased quality and speed throughout the translation supply chain.

What are the new features and updates in SDL Trados 2007 SP2?

New! Additional file format support accept the latest DTP formats:

Now you can work with the latest file formats including Adobe FrameMaker 8.0, Adobe InDesign CS3 and QuarkXPress 7.x (via CopyFlow from Napsys)

New! QA Checker 2.0 - the most powerful quality assurance checker on the market:

Providing new features, such as trademark character checks, as well as improved performance, including number and date checks

New! Microsoft Word Spelling Checker 2.0:

Faster, more powerful and compatible with Microsoft Word 2007

New! Localized SDL Trados 2007 documentation:

Key user guides and online help are now available in French, German and Japanese

New! Conversion utility for complex markup:

Allowing you to handle HTML content embedded in XML and other format combinations

New! Over 200 other product updates:

Providing additional functionality and improved customer experience, including accelerated start-up performance and overall execution speed

New! Includes SDL MultiTerm 2007 SP1:

Download the latest service pack to receive over 40 updates, including the ability to run a duplicate search in SDL MultiTerm Online

Also includes 3 highly-ranked customer suggestions from [ideas.sdltrados.com!](#)
